

# ERHS Robotics Club

7601 Hanover Parkway, Greenbelt MD, 20770

We are a group of 70 students building large and small scale robots for competition, learning, and fun. Help us bring STEM education into the community, expand our volunteer programs, and show the importance of robotics in the community. Your help would directly support:

- the growth of our high school program and its success
- formation of science and engineering enrichment programs at local elementary schools
- development of further community outreach initiatives

Money is always a need for us, as we must pay for competitions, raw materials, and tools. If you would like to help us out by donating, please follow these instructions:

- All checks should be written to "Eleanor Roosevelt High School" with "ERHS Robotics Club" in the memo line. Please give the check to your club member for delivery to Dr. Davida Taylor, faculty sponsor.
- Cash and money orders are also acceptable.
- You will receive a receipt in return.
- Please remember that this donation is tax-deductible.
- Many employers have matching donation programs. Check with yours to see if they will help!

If you have any further questions, please contact the following people:

**Mr. Patrick Healey** – Team Manager  
mentor@erhsroboticsclub.org

**Dr. Davida Taylor** – Faculty Sponsor  
davida.taylor@pgcps.org

**Vishnu Rachakonda** – President  
president@erhsroboticsclub.org
